Brasília, Brazil

Software Engineer
Alice

July 2024

- Frontend development for the Customer Success area in the user and dependent management system for healthcare plans, using **Vue, Sass, and Vitest.**
- Creation and documentation of modular and componentized interfaces in **Storybook**, ensuring consistency and reusability.
- Automation of deployment processes for staging and production environments using **GitHub Actions**.
- Development of a customized charting library with **D3.js** integrated into Vue, tailored to meet specific business needs.

Software engineer
Itaú Unibanco

Fev 2023 - July 2024

- Frontend development of Real Estate Financing systems for companies in the contracting and release stage using **Angular, Sass, and Jest**.
- Updated applications using the new company design library, which helped to follow a standard across all system applications.
- Enhanced system interfaces following UI/UX standards, thereby facilitating customer flow within the systems.

Software engineer
Compass UOL

Mar 2021 - Fev 2023

- Frontend development of e-commerce systems, ensuring an optimized shopping experience for users.
- Created **React** components with **Sass** for the STIX website, meticulously following the high-fidelity prototype developed in Figma, ensuring visual and functional consistency.
- Actively participated in the development of **Angular** systems with **Sass** for the Grupo Osten website, contributing to the creation of an efficient and modern online platform.
- Participated in the accessibility chapter, carrying out studies and sharing good frontend development practices with screen reading.
